

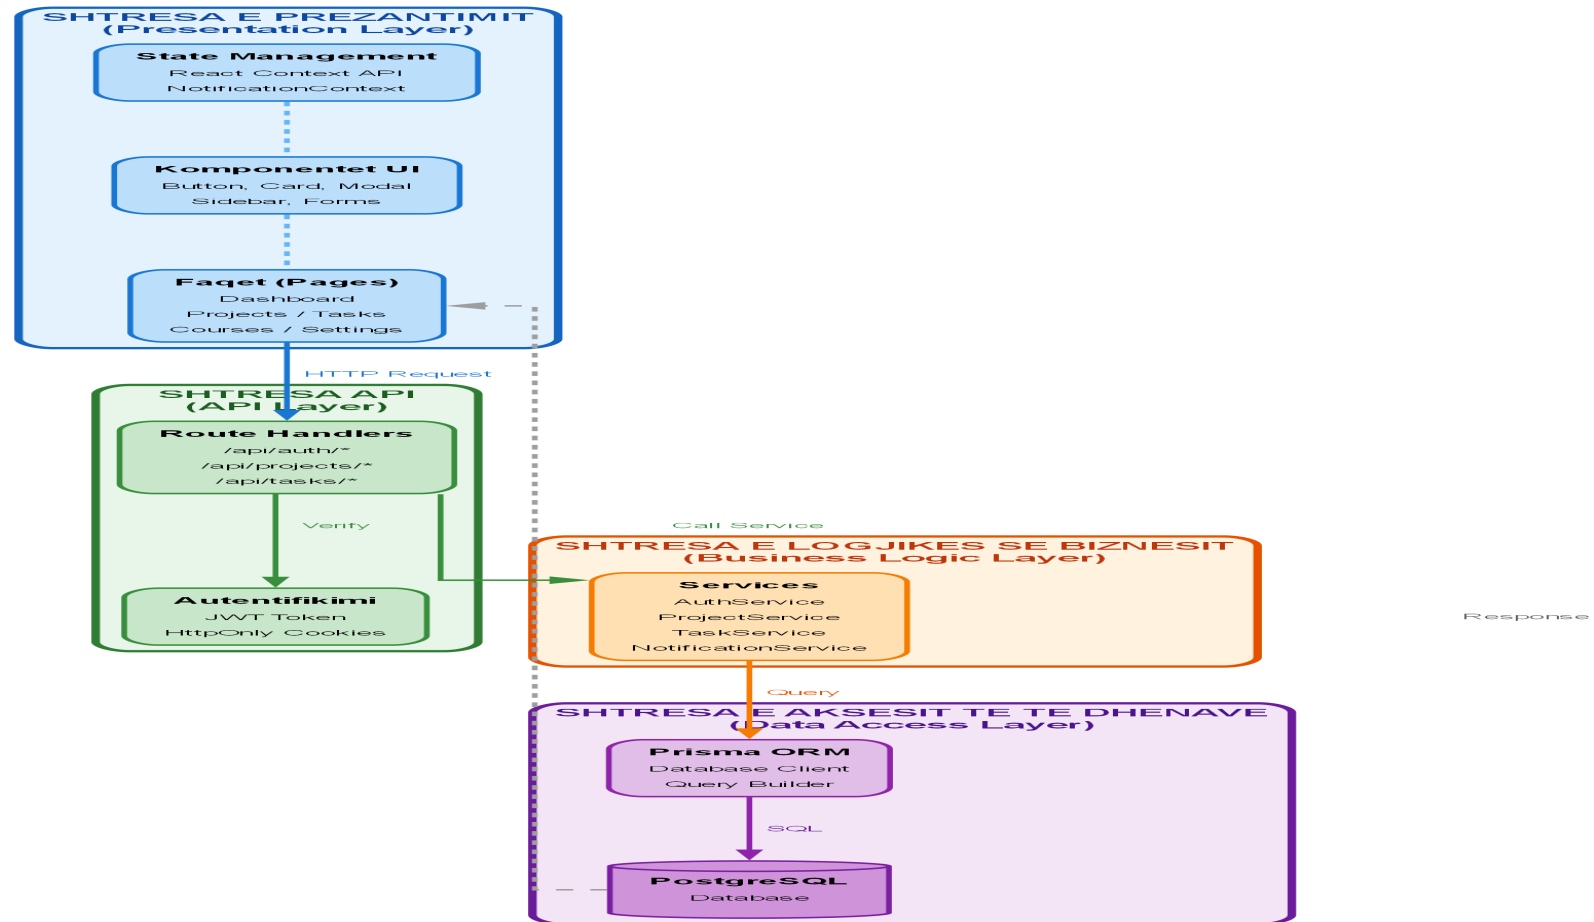

Diagrami i Arkitektures

Arkitektura e Shtresuar (Layered Architecture)

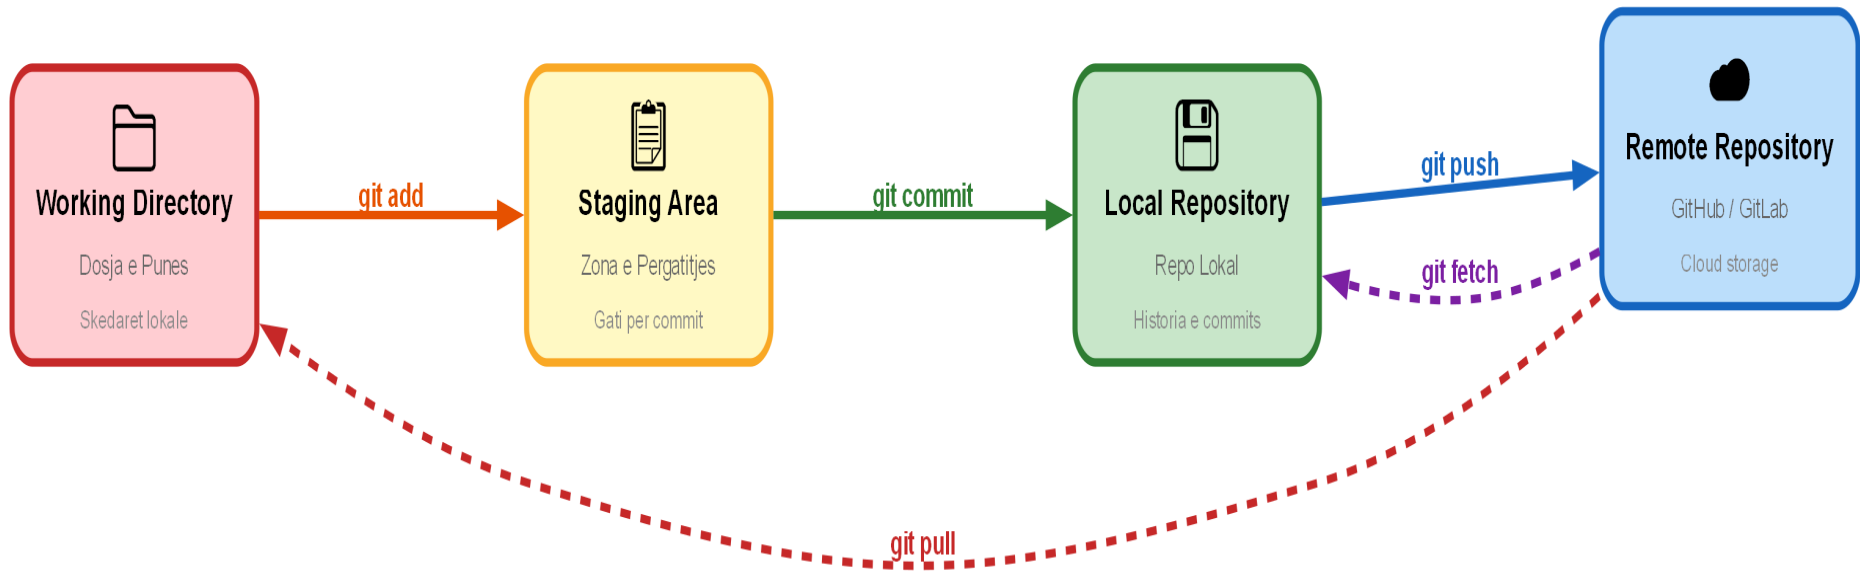

Shtresa	Teknologjia	Pergjegjesia
Prezantimi	React + Next.js + Tailwind	UI, Faqet, Komponentet, State
API	Next.js Route Handlers	HTTP Requests, Auth, Validim
Logjika e Biznesit	TypeScript Services	Rregullat, Operacionet, Notifications

Aksesi i te Dhenave	Prisma ORM + PostgreSQL	Database, Queries, CRUD
---------------------	-------------------------	-------------------------

Diagrami i Git Workflow

Rrjedha e punes me Git

Komandat Kryesore te Git

Komanda	Pershkrimi	Shembull
<code>git add</code>	Shton ndryshimet ne Staging Area	<code>git add .</code> ose <code>git add file.ts</code>
<code>git commit</code>	Ruan ndryshimet ne Local Repo	<code>git commit -m "Shtova feature X"</code>
<code>git push</code>	Dergon commits ne Remote (GitHub)	<code>git push origin main</code>
<code>git pull</code>	Merr ndryshimet nga Remote	<code>git pull origin main</code>
<code>git fetch</code>	Shkarkon ndryshimet (pa merge)	<code>git fetch origin</code>

<code>git status</code>	Shfaq gjendjen aktuale	<code>git status</code>
<code>git log</code>	Shfaq historine e commits	<code>git log --online</code>

Rrjedha Tipike e Punes

Hapi	Veprimi	Komanda
1	Krijo ose modifiko skedare	(editor)
2	Shiko ndryshimet	<code>git status</code>
3	Shto ne staging	<code>git add .</code>
4	Krijo commit	<code>git commit -m "mesazhi"</code>
5	Dergo ne GitHub	<code>git push</code>
